## PROTEST AGAINST TAX ON TRAVELLERS

### THE MANUFACTURERS REQUEST REMOVAL

Resolution Regarding Trade—Provincial  
Vice-Presidents Elected—Boguet  
Closed Annual Meeting.

Quebec, Sept. 21.—At yesterday afternoon's session of the annual meeting of the Canadian Manufacturers' Association, the following officers were elected: President, C. B. Bagnall; Vice-President, H. C. Bagnall; Secretary, H. C. Bagnall; Treasurer, H. C. Bagnall; and a number of other officers. The association will hold its annual meeting in Montreal on October 1st.

A resolution was passed in favor of protesting against the proposed tax on travellers. The resolution was adopted by a large majority.

The meeting was held in the Grand Hotel, Quebec, and was attended by a large number of delegates from various manufacturing associations.

The meeting was held in the Grand Hotel, Quebec, and was attended by a large number of delegates from various manufacturing associations.

### BASEBALL DISPUTE.

Test Case Likely to Arise Through Re-Instatement of Pitcher in National League.

### FRANCE AND GERMANY.

Committee of Peace Congress Favors Closer Relations Between the Two Countries.

Lucerne, Switzerland, Sept. 21.—The international peace congress at its session today approved the report of its committee favoring a rapprochement between France and Germany by the establishment of closer commercial and political relations.

## BATTLESHIP MIKASA WILL BE FLOATED

### JAPANESE ARE NOW PREPARING FOR WORK

Steamer Garonne Among Vessels Chartered to Carry Russian Prisoners to Their Homes

Tokio, Sept. 21.—A powerful pump has been installed at Sasebo for the purpose of floating the battleship Mikasa. The ship was recently sunk with great loss of life. It is expected to refloat the Mikasa within three months.

Admiral Decorated.  
Seoul, Sept. 21.—Admiral Araki, who defeated the Russian projected cruiser Variaz, was given an audience by the Emperor and decorated before he sailed for Japan on Tuesday last. It is probable that he has been recalled to raise the Japanese battleship Mikasa sunk in the harbor at Sasebo.

The Russian cruiser Variaz was sunk by the Japanese fleet at Chemulpo on February 9, 1904. The Russian cruiser Korietz was sunk at the same time.

To Carry Prisoners.  
Odessa, Sept. 21.—The government has chartered the American steamer Garonne which, with the Argona and the volunteer fleet steamer St. Petersburg, will carry Russian prisoners to their homes.

The suspended papers.  
Tokio, Sept. 21.—The expressions of dissatisfaction over the terms of the treaty of peace in the columns of the local papers are not so frequent as they were some time ago.

The suspension of the papers is due to the fact that the government has decided to suspend the publication of the papers for a period of three months.

The suspension of the papers is due to the fact that the government has decided to suspend the publication of the papers for a period of three months.

## TO BUY SHIPS FOR CANADIAN NAVY

### MINISTER OF MARINE ARRANGING FOR THEM

Department of Justice Has Received Reports and Evidence From Chief Justice Hunter.

Ottawa, Sept. 21.—Hon. R. Prefontaine will take a trip to the maritime provinces and when he returns will go to England to arrange with the admiralty for the purchase of ships for the Canadian navy. Legislation for this will be forthcoming next session.

The Collins Case.  
The minister of justice yesterday received from Chief Justice Hunter the reports and evidence from the Collins case.

The Collins case is a case involving the ship Collins, which was sunk in the Atlantic Ocean.

## ESQUIMALT FORTS UNDER DISCUSSION

### Sir Frederick Borden Explains Position of Government on That Question—Military Training in Schools.

Not known to-day what the intentions are on that point. The minister, "To maintain a fortress at large expenditure which was never to be used would be unwise."

Arriving at the hotel promptly at half past four o'clock he was met by Gen. Riley, M.P., R. B. McMeekin, president of the Liberal Association, and a large number of the members of the party.

After being presented to all of those present and exchanging a few words, President McMeekin explained to the minister that the short notice of this informal gathering accounted for the absence of a large number of the friends of the party who would have been glad to attend had they been aware of the fact that it was being held.

He said they had gathered to pay their respects to Sir Frederick personally and also to the government of which he was a worthy member. They also desired, he said, to discuss with him a few questions coming under his department at Ottawa which had a local significance.

Foremost among these was the question of the government's plans with respect to Esquimalt, which it was understood was soon to be taken over by the Dominion government.

Sir Frederick, upon the point being raised, said that he did not know that he could give much information.

Concerning Esquimalt, other than had already been given out, he said that according to the arrangements with the Imperial authorities the Canadian government was to take the works at Esquimalt over on July 1st.

That was the date fixed, and he knew of no change. "I came at this time with Gen. Lake to look over the buildings and see what is here and what we are taking over," he said.

At Halifax the works were being taken over he expected on October 15th. In arranging for the taking possession of those fortifications the Canadian government had been asked to fix a date.

The 15th of September had been suggested. No reply was received to the answer sent to the Imperial authorities before the date of October 15th was suggested by the Canadian government.

In the meantime the reply came from the Imperial authorities accepting September 15th as suitable. It was not at all likely, however, that the forts at Esquimalt would be taken over until October 15th.

"We are trying to get the educational departments of the different provinces interested in the physical education of the children," he said.

Frederick, he hoped, he said, in the near future to have a convention of the ministers of education of all the provinces, when arrangements might be made to set in common in this work. It would be a good thing for the children, he said.

He said that according to this arrangement the teachers might be taught in this branch in the Normal schools, and pass their examinations in physical culture as well as in other subjects. Under the present arrangement there would be no extra expense put upon the provinces, as the Dominion government would.

Supply instructors.  
The governments of Manitoba and of British Columbia had shown themselves sympathetic in this scheme.

"There will be no politics in it," said Sir Frederick. "I do not want it to be so regarded. It should be able to find one of two things which can be done without introducing party politics. This is one of them."

The minister expressed himself as highly pleased with his trip to the West. "I had never been west of Ontario before," he said. "I had heard that I could not get under that reputation any longer."

He had been well repaid by the trip. The future greatness of Canada he realized depended largely upon the Northwest and this great province, which up to the present had only been scratched.

W. K. Houston asked Sir Frederick if he could give an idea of the number of men which it was the intention to maintain at Esquimalt.

Replying the minister said that the present intention of the government was to maintain about the same number.

"It is an actual fact, that the moment that England adopts a defensive tariff the beginning of international reciprocity will be at hand, and not until then. Business is a bloodless war, if you will, but it is a war, and peace can only be attained when one nation is strong enough to compete with another by the use of equivalent weapons."

There never was a time in the history of the two countries when the pro-American feeling was so strong as it is at the present in England. It is a great and absolute admiration for American energy, power and intellect. The day of jealousy on the part of England has gone for ever."

Sir Gilbert declared annexation is a dead issue in Canada.

ARBITRATION TREATY.  
San Sebastian, Spain, Sept. 21.—King Alfonso today signed a treaty of general arbitration between Spain and Belgium.

## FUTURE SITTINGS OF COMMISSION

### THEY ARE TO BEGIN EARLY IN NOVEMBER

It has been arranged to meet Washington delegates to discuss Fishery Matters.

The Fishery Commission have decided upon some lines of action for future meetings to be held. In the meantime the commission has discontinued its sittings until probably November.

It is altogether likely that the Canadian commissioners will meet with the Washington commission on November 1st. That date has been tentatively fixed for the joint meeting, dependent upon its being satisfactory to the Washington representatives.

In the meantime the United States commission will be corresponded with and the place of meeting be agreed upon.

Interviewed in Vancouver T. R. Keshaw, fishery commissioner for the state of Washington, is reported to have said that Washington state was ready to co-operate with the Canadians in protecting the industry.

On November 7th a preliminary meeting of the commission will be held in this city for the purpose of making full arrangements for the joint meeting.

As at present arranged the public meetings of the commission will be held at New Westminster, November 14th and 15th; Vancouver, November 16th and 17th; Victoria, November 21st and 22nd; Nanaimo, November 23rd and 24th, and Duncan, November 27th.

Further meetings will be arranged for later.

J. C. Brown, one of the members of the Board of Fishery Commissioners, was a few years ago, a familiar figure about the streets of Victoria. He was for a time Minister of Finance in the Martin cabinet, and a member of the Legislature. Mr. Brown's last hand in the political fight was in the Dominion election, when he was elected as member for the constituency of J. B. Kennedy.

He gave freely of his time and his ability to secure the election of that gentleman.

Mr. Brown is remaining over in the city today and will go up to the Royal City to-morrow morning.

"Our work so far," he said to-day, "has been devoted to a discussion of the scope and conduct of the commission. We were all strangers to one another and it takes some time to get down to anything definite. We felt that it was advisable to postpone any meetings of a public character for a variety of reasons."

The first of these of course was the absence of Mr. Brown. It was, however, as he said, a very good reason. He was accompanied by Alex. Wilson, who saw much of him and reserved the right to offer a few criticisms as well. Secretary Swinerton of the exhibition opined that it was a difficult machine to handle, but no harder to run than the fair.

He thought, however, the unforseen prevents, the Times will issue regularly from its new press, and readers may expect to see growing improvement even in the excellent mechanical appearance of yesterday's edition.

Not only that, but notwithstanding the heavy expense involved in putting in this machinery, the Times management intended to greatly improve the paper. In other respects increasing the amount of reading matter and adding features regarding some of which notice has been given.

In deference to the expressed wish of many Times has set apart Friday afternoon as ladies' day, when all lady friends will be welcome.

RAILWAY COMMISSION.  
Some of the matters which were discussed at Wednesday's session in New Westminster.

(Special to the Times.)  
New Westminster, Sept. 21.—The double jacking of Front street caused the attention of the railway commission of yesterday's session. The V. & W. Y. track outside the C. P. R. has not been allowed to be used since built a year ago. The C. P. R. stated its willingness to take over this track on the city water front, using it for a siding and allowing the V. & W. & Y. the use of C. P. R. rails in the city. This was supported by the board of trade, the city favoring independent tracks. Incidentally the C. P. R. questioned the city's title to the water front. Decision was reserved.

The most dangerous V. W. & Y. crossing complained of by the municipalities of Esquimalt and Burnaby and the nearby proposed was left without comment by the commissioners.

R. Gardiner, the C. P. R. freight discrimination against local shippers the company has put on a daily car between Westminster and Kamloops exclusively for Westminster freight.

MME. SCHUMANN HEINCK.  
Prima Donna is Suffering From Throat Trouble and Has Returned to New York.

(Associated Press.)  
Sydney, N. Y., Sept. 21.—Mme. Schumann-Heink arrived here this morning suffering from throat trouble. A specialist was consulted, and the prima donna was hurried to New York for treatment. The local engagement for tonight was cancelled. The "Loves Labor Lost" company remains here until word is received from the New York manager regarding the filling of future engagements.

CHINESE CUSTOMS RETURNS.  
(Associated Press.)  
Shanghai, Sept. 21.—The Chinese customs returns for the second quarter of 1905 show an increase of nearly 30 per cent. over those of 1904. In Shanghai the increase was nearly 90 per cent.

## THE NEW PRESS IS NOW IN SERVICE

### TIMES BEING PRINTED REGULARLY ON BOX

Typographical Appearance of Ten Page Edition Printed Yesterday—Ladies Day To Morrow

Although the Times mammoth press made its official debut on Saturday afternoon under distinguished auspices, the typographical appearance of the paper was not sufficiently good to permit of further publication by the same means until an improvement could be assured.

Hence on Monday and Tuesday the crew of the press and stereotyping rooms were kept busy adjusting impressions, testing rollers and cylinders, replacing poor matrices with good and otherwise providing for a creditable appearance when the mammoth flow was once more brought into service. While this was being done the old reliable Wharfedale which has fathered the Times for fifteen years was kept in commission and turned out the issues on the days mentioned in its usual creditable style.

Yesterday, however, a second run was made from the new machine with results altogether happy. The defects and deficiencies which had been discovered in the test of a day or two previously had all been remedied and the big machine moved like clockwork. A splendid impression was obtained from all the plates and an excellent paper published, which excited much favorable comment.

The press room was little less crowded than on Saturday and the paper continued until the last paper had been delivered and carried to the mailing room. The newboys seem to appreciate the change as much as any, for where they formerly had to wait in some instances for an hour for their turn, the papers are now handed to them almost as fast as they present themselves, and a moment later are being "cried" on the streets.

Among those who were attracted by the run of yesterday's issue, Chief Justice Hunter, ex-Justice Walkem and Judge Lammiman. All three were intensely interested in the operation, and doubtless mentally contrasted the speed of the Times machinery with that slowing of that of the old. Another visitor was Mr. Caulwell, manager of the Canadian Paper Company of Montreal, who thinks the Times will never quite assert the public as it should until it buys its rolls from his mill. Later, Commissioner J. C. Brown, ex-M.P.P., who was long owner in the newspaper business to feel the spell of printing machinery, dropped in and remarked on the strides provincial journalism was making since he had arrived.

He was accompanied by Alex. Wilson, who saw much of him and reserved the right to offer a few criticisms as well. Secretary Swinerton of the exhibition opined that it was a difficult machine to handle, but no harder to run than the fair.

He thought, however, the unforseen prevents, the Times will issue regularly from its new press, and readers may expect to see growing improvement even in the excellent mechanical appearance of yesterday's edition.

Not only that, but notwithstanding the heavy expense involved in putting in this machinery, the Times management intended to greatly improve the paper. In other respects increasing the amount of reading matter and adding features regarding some of which notice has been given.

## TAX ON "BAGMEN"

We regret to report two more ex-

hibitions of contempt for the position of

British Columbia, taken at the instance

of the present provincial government. At

a conference of the Association of British

Chambers of Commerce assembled at

Liege, Belgium, we are told that in the

course of a discussion on the Quebec

legislature's tax on commercial travel-

lers a Leeds delegate asked: "Would any

civilized country adopt proposals so ob-

noxious and so derogatory to the union of

the Empire?" It was, he said, as if

Yorkshire taxed travellers from Lan-

cashire, British Columbia has also

placed a tax on commercial travellers,

any steps which brought Russia and Ja-

pan, the great twentieth century belli-

gerents, peacefully into each other's arms.

It is true a shadow has been cast upon

the famous political victory over Parker

of New York by certain revelations as

to the part great financial corporations

played in the fight. Investigations into

the manner of conducting the affairs of

United States insurance companies have

disclosed the fact that contributions of

fifty thousand dollars to the campaign

funds of the Republican party were not

unusual or even considered extraordi-

nary. It is computed that if all the great

corporations in the United States con-

tributed in the same ratio as such insur-

ance concerns as the Equitable and the

New York Life, the Republican fund for

the political "enlightenment" of the el-

ectoral community must have amounted

to the not insignificant sum of five million

dollars. So that the victory of President

Roosevelt may not have been so famous

after all.

But we are not disposed to attempt to

detract from the glories of President

Roosevelt's achievements. What we

purpose at the present time is to point

out that at last the president is "up

against" forces which may prove his un-

doing. If he cannot furnish a sufficient

and a satisfactory explanation of a cer-

tain damning fact his flaming career may

be brought to a dismal close in a hot

ashes. The Allegheny County Women's

Christian Temperance Union has ap-

pointed a committee which will put the

following question to President Roose-

velt: "Did you receive sixty bottles of

beer from a brewer's association; and did

you or your representative send the

brewers a letter of thanks on White

House stationery for the same package—

and what became of the sixty bottles of

beer?" It will be observed that the sting

of this imperative demand lies in the tail

thereof. What became of the sixty bot-

tles of beer? Imagination can easily

conjure up the wild orgies that took place

within the limited retinue of the White

House as a consequence of the consump-

tion of such a quantity of raging stim-

ulants. Was the throat of the famous

president himself "irrigated" to an in-

temperate extent with any part of that

dud, contributed gratis by the members

of a brewers' association? It is a pity

Mr. Bryan has definitely announced that

under no circumstances can he be a

presidential candidate in 1908. His

fame as a strictly temperate man, far

above the allurement of special brands

of brews of presentation beer, is above

suspicion. He would have had a glorious

opportunity to establish the name of the

republic for temperance and to purify

the White House of all alcoholic odors,

if he had not been committed on his

solemn word to private life. But the

chances of the Democratic party are

bright. Whoever their candidate may

be, the sixty bottles of beer, although in

a physical sense they have gone down,

will in a political sense play a very im-

portant part in the campaign. They will

be of significance greater far than the

underest word of a British minister

uttered in response to the artful queries

of a political detective.

As we have a real admiration for the

president personally, and the most pro-

found belief in the merits of his achieve-

ments for the United States and the

world, we shall be sorry to see him

ground in pieces politically between the

bottles of brewers' associations and the

physically symmetrical, but on matters

of principle hard and unyielding, bottles

of the Allegheny Women's Christian

Temperance Union.

"Summer is gone!" wails the Voice of

## CAN YOU SEE WELL?

If not, come and let us ex-  
amine your eyes, and fit you with

ESQUIMALT FORTS  
UNDER DISCUSSION

(Continued from page 1.)

in the House last session were incorrec-  
tly reported and a wrong impression  
given out.

"What was wanted was that the boys  
during their formative ages should be  
taught the rudiments of military drill.  
The country lost nothing according to  
this scheme. There was no loss of dol-  
lars and cents because no time was with-

drawn from labor as it was during a  
period before the boys entered upon their  
life's work. At the same time the train-  
ing given would be of great advantage in  
the way of defending the country."

Trustee Mowat referred to the weight  
of the rifles issued to the cadets, and  
asked the minister if lighter ones could  
not be supplied.

In reply the minister said he thought  
it might be better to have lighter ones.  
The subject would be gone into fully. It  
was a matter of detail, which he thought  
there would be no difficulty in overcom-

ing. Mr. Mowat asked if it would not be  
well to increase the number of corps,  
and instead of one here have a greater  
number.

Sir Frederick agreed that this was  
what he contemplated.

"What help will the Dominion govern-  
ment give?" asked Mr. Mowat, "if say  
500 cadets were enrolled would you in-  
structor be provided?"

"I think so," replied Sir Frederick.  
"We would make arrangements for in-  
structors at the Normal schools and in  
cases where an instructor was needed  
for the schools one could be sent." It  
might be possible to send instructors for  
a district, he said. Of course with the  
teachers all trained in the Normal  
schools they would be able to impart in-  
struction in the lower grades. What  
was wanted was the cooperation of all  
the provinces for a uniform system of  
instruction.

Mr. Mowat called attention to the  
fact that the board of trustees did not  
feel like asking the ratepayers to fur-  
nish the money for paying an instructor,  
although the board might favor

Maintaining Cadets  
yet the paying of the instructor offered  
an objection. He wanted to know if the  
minister could give some assurance now

given by the officers of the Fifth Regi-  
ment at the drill.

The event proved a very enjoyable  
one. It was almost entirely confined to  
military men. His Honor Sir Henri  
Joly de Lotbiniere, who had been invited,  
was unable to attend.

His secretary, Mr. Muskett, however,  
was present. Hon. Senator Templeman,  
who was likewise invited was out of the  
city, and so necessarily absent. Geo.  
Riley, M. P., also found it impossible  
to accept the invitation, being indis-

posed. There were present beside Sir Freder-  
ick, Major-General Lake and Mr. Parret,  
secretary to Sir Frederick, the officer of  
the Fifth Regiment, Col. English and  
Major Bland from Work Point Bar-  
acks, Col. Holmes, D. O. C., Col.  
Prior, formerly in command of the Fifth  
Regiment, and Col. Jones.

The dinner was conducted along the  
lines of a regimental mess dinner with-  
out any formal toast list.

Col. Hall, however, proposed the  
health of the minister, which brought  
Sir Frederick to his feet in reply. He  
made reference to the taking over of the  
Esquimalt station, and said that in some  
quarters fault had been found with the  
scheme as it was said it was severing the  
ties which bound together Great Brit-  
ain and Canada. This false im-  
pression, Sir Frederick said, was  
well answered by the fact of an inter-  
change of officers between the Imperial  
and Canadian services had been ar-

Major-General Lake also spoke briefly  
last evening, and short speeches were  
also made by Col. Prior, Col. Jones and  
others.

From the dinner Sir Frederick and  
Major-General Lake proceeded direct to  
the steamer, leaving this morning for the  
Mainland.

The homeward trip will be made by  
way of the Crow's Nest Pass, thence to  
Edmonton with a cross country ride  
from that point to the present terminus  
of the Canadian Northern.

able, \$1.25 a pair.

## On Saturday

## Kootenay Steel Range

SAVES FUEL

It is not the first cost of a range which makes it cheap  
or expensive, but the amount of fuel it afterwards consumes.

If you buy a range a  
few dollars cheaper than a  
Kootenay, and it burns  
from 15 to 25 per cent.  
more fuel, what do you  
gain? Nothing; but you  
actually lose money, besides  
putting up with all the  
inconveniences of an old-  
style range.

The Kootenay is equip-  
ped with every known device  
for reducing the consump-  
tion of fuel.

Sold by all enterprising dealers.

## HANDBALL WILL BE THE POPULAR GAME

### AMONG LOCAL CLUBS IN WINTER SEASON

Three Victoria Athletic Associations Improving Courts For Pastime—Notes.

With the approach of the winter season athletes are beginning to turn their attention to indoor pastimes. If present indications can be relied upon one of the most popular of these will be handball. The game promises to rouse more enthusiasm among the members of the different clubs than ever before, as already several J. B. A. A. players have started holding regular friendly contests. But the James Bays are not the only ones interested. Both the Y. M. C. A. and Fernwood representatives intend devoting more time to the game than heretofore, and expect to develop players capable of successfully competing with the best exponents of the J. B. A. A. before the season is far advanced.

Realizing that there is no more fascinating indoor game than handball, the management committees of the J. B. A. A., Y. M. C. A. and F. N. A. A. are taking advantage of the present opportunity to put their courts in the best possible condition. A few minor repairs have been ordered in connection with the former. At the Y. M. C. A. gymnasium it is planned to lay a new floor, besides making the wall as solid as possible. This will make the playing area as level as a billiard board, and should result in a court in every way equal to the best of which Victoria boasts. The Fernwoods, however, are not holding their courts in connection with that organization on Monday, the 2nd of October, as proposed that a friendly exhibition basketball match shall take place between the Y. M. C. A. business men's team and a similar organization from the F. N. A. A. on that occasion. Besides this there will be a number of other attractions. In short, an excellent programme is being arranged on a pleasant time is promised all attending.

### THE KENNEL

B. C. FIELD TRIALS.

This morning the annual trials under the auspices of the British Columbia Field Trial Club are taking place at St. George's. They will continue until Saturday. A number of local dogs are competing and some excellent contests are anticipated. It is expected that the conditions are very favorable, there being plenty of birds and the ground being in just the proper shape to intensify the scent and make the running good. Miss Davis and a number of other ladies are attending.

### AUTHORITY FOR DANCING

Cardinals Decided 400 Years Ago If M. Amusement.

London, Sept. 20.—The Cardinals of Milan in 1501, when the balls are said to have been introduced. At these 100 Cardinals de Neuchâtel and St. Leger, footed with the rest of the courtiers.

### LACROSSE

VICTORY FOR CENTRALS.

Yesterday afternoon the second league game for the Junior championship was played between the Central and North Ward school teams. It resulted in a victory for the former by a score of 8 goals to 3. The game, however, can hardly be taken as an indication of the character of the game. Although the ground was in poor condition and the rain fell heavily and constantly, the game was played with spirit and the Central team was victorious.

### EXECUTIVE MEETING

An important meeting of the executive committee of the Victoria Lacrosse Club will be held this evening at the Y. M. C. A. rooms. Matters of importance will be considered and a full attendance is requested.

### MANITOWA CHAMPIONSHIP

Winnipeg, Sept. 20.—The final game of lacrosse for the championship of Manitoba was played today at Treherne between the Winnipeg and Souris teams and was won by Souris by 5 to 2.

### BASKETBALL

MEMBERS OF THE ST. LOUIS COLLEGE CHAMPION JUVENILE BASKETBALL TEAM were presented with medals indicative of their victory over all competitors during the past season last evening. Together with a large number of friends, the players gathered at the Y. M. C. A. rooms about 8 o'clock and proceedings were immediately opened by President E. M. Whyte, who occupied the chair. After the reading of a business programme, which was published in these columns yesterday, Richard Hall, M. P. P., conducted the presentation ceremony. He delivered a short address, congratulating the St. Louis team upon its splendid record. Following this all joined in the National Anthem.

### ASSOCIATION FOOTBALL

VICTORIA V. GARRISON.

It is probable that match will be played between the Garrison and Victoria United teams on Saturday afternoon at Oak Bay. The latter has acquired a challenge and Captain A. G. Goudreau, who is expected to lead the team, is confident of success.

providing he is able to get together his eleven in time for the contest. It is expected that the soldiers will meet their rivals once more before the departure of a number of their fastest players for Eastern Canada. If the contest is arranged a splendid exhibition may be expected.

### MEETING TOMORROW

An organization meeting of the B. C. D. A. will be held tomorrow evening at the Y. M. C. A. rooms, when matters in connection with the "Dance" local leagues, senior, intermediate and junior will come up for consideration. All clubs intending to have teams in any of the three series mentioned must be represented by one or more delegates. The chair will be taken at 8 o'clock and a social invitation is extended to all interested in the game.

### RUGBY FOOTBALL

A BRIGHT OUTLOOK.

Referring to the outlook in Vancouver for Rugby football this season, the News-Advertiser says: "The Rugby men are busily preparing for the coming season, and from present indications Vancouver will this season have some 'tough' players than any other city in the West. That the game will be the major sport of the winter is evident by the great interest that is being taken in the annual meeting of the champions. Nearly all of last season's team will be in the game again, while there will be many new candidates for a position on the same fifteen. Practices will be commenced early next month, as all of the players are anxious to get back in the game as soon as possible."

### HOCKEY

#### MEMBERS ELECTED

At an executive meeting of the Victoria Hockey Club held evening the following members were elected, making a total of 18 for the season: H. J. Richmond, A. C. Rowe, G. Simpson, R. McInnis and Gordon Jameson. Other matters of minor importance were considered, after which the meeting adjourned.

### ATHLETICS

#### A GRAND OPENING

Arrangements are being made by the management committee of the Fernwood Athletic Association for a grand opening of its gymnasium in connection with that organization on Monday, the 2nd of October, as proposed that a friendly exhibition basketball match shall take place between the Y. M. C. A. business men's team and a similar organization from the F. N. A. A. on that occasion. Besides this there will be a number of other attractions. In short, an excellent programme is being arranged on a pleasant time is promised all attending.

## WEEKLY WEATHER SYNOPSIS:

Victoria, Meteorological Office, 19th to 24th September, 1905.

Weather conditions have begun to assume the usual fall and winter type of the North Pacific Coast, storm areas from the ocean moving down from the north as far as Vancouver Island and then passing eastward into the Canadian Northwest. The weather has been unsettled and threatening during the greater part of the week, with the exception of Friday, 15th, when after ten hours of bright sunshine were registered a continued series of low pressure areas have developed on our coast, causing in their passage heavy rainfall throughout the province and the adjoining states of Oregon and Washington; the rainfall has been abnormally heavy for the whole month. Temperatures during the week have been moderate in British Columbia, becoming, however, much higher at times in the Pacific states, especially between the ranges, though an occasional light frost occurred in exposed places on the higher lands. In the Yukon the first snowfall was reported at Dawson on the 18th. In the Northwest a considerable amount of rain fell, several thunderstorms occurred and temperatures on the whole have been seasonable.

At Victoria—Highest temperature, 62.2 on 18th; lowest, 48.3 on 15th; rain, 1.00 inch; bright sunshine, 28 hours 30 minutes.

At Vancouver—Highest temperature, 63 on 18th and 19th; lowest, 44 on 15th; rain, 1.06 inches.

At New Westminster—Highest, 62 on 18th and 19th; lowest, 46 on same dates; rain, 2.41 inches.

At Kamloops—Highest, 72 on 19th; lowest, 62 on 18th; rain, 0.36 inch.

At Barkerville—Highest, 61 on 13th; lowest, 39 on 15th; rain, 0.41 inch.

At Fort Simpson—Highest, 58 on 13th; lowest, 30 on 15th; rain, 2.20 inches.

At Athol—Highest, 54 on 13th; lowest, 30 on 14th; rain, 0.04 inch.

FAMILY MURDERED.  
Husband Kills His Wife and Three Children.

In despair at finding himself without the means of livelihood, without money to procure food for his wife and three sons, and with the knowledge that he was suffering from a fatal disease of the liver, M. Rouffaut, formerly a well-to-do manufacturer, murdered his wife and family and then committed suicide, says a Paris dispatch.

The police magistrate of Nogent-sur-Meuse, a pretty suburban town a few miles east of Paris, received the following letter, signed Rouffaut:

"On receipt of the present letter be so good as to go to No. 1, Boulevard de Strasbourg, where you will find five corpses. I am ill and without resources, and cannot avoid this sad ending. You will find the key under the mat."

Horried at such a letter, but hoping to be able to go to No. 1, Boulevard de Strasbourg, where you will find five corpses, I am ill and without resources, and cannot avoid this sad ending. You will find the key under the mat."

# HERR SPIEGLBURGER: SUCH A GOOSE BIZZNE VAT IT IS

# SIMON SIMPLE AND MI-PA TAKE AFTER EACH OTHER

# Romance Behind the Hoe.

(One Denizen Speaks.)

No, Newcomer! Tell me—now that Fortune's dials  
Hath drawn my purse to one lone line of dimes—  
Wouldst thou counsel my penitential nickel  
To squander on the Times?

Were it not wiser far, and more befitting,  
That I should clutch my coin and homeward speed  
Than, penniless, to spend ten minutes sitting  
Midst these who tram and read?

What is there after all that you can offer  
To tempt me with your journalistic lies  
That I should break my modest thrift for suffer,  
Sacred to Samuel Smith?

Plaint not at me your editorial leaders—  
Time was when truth was spread with printers' ink.  
But now, the homilies you pass your readers  
Are tarished by a wick.

Your news! I hear it from the man who makes it,  
Rumormongers and I were chums, long, long ago—  
Besides, we know the A. P. always takes it,  
When happenings are slow.

Your letters from the public, impudences!  
Altho' I be, some folks still grace my shelf,  
And when I seek for better stuff than Julius',  
I'll write the things myself.

The paper's not yours, my lad—all journalism  
To-day runs blasky white in prosy ways—  
Cold science-stuff, and here the poet's plume,  
Romance—and colored rays.

Your clickety type, edged wheels and modern gears  
Have muffled machine of those who once were men—  
And such as look on with doubtful fearing  
And moor the old mill pen.

Go, get thee gone, my little news sheet vendor,  
Be brave and good, and let this comfort young  
Selling Carriage, the thrush-like money lender,  
Once peddle papers too.

(The Newsboy Outcries.)

Now, by the grave of Gutenberg, the Master,  
Whose craft hath taught the centuries to live,  
Keeping all arts from chaos and disaster,  
The Art Preservative.

And by the fame of Caston's wondrous story,  
Who from far Bruges, a wandering man of Kent,  
Brought home the "Book of Chess" to shine in glory  
O'er England's Arment.

And by the name of him who followed after—  
Wynkin de Worde, and the Westminster Press,  
I will not stand for thy sarcastic laughter  
And sneering banter.

Wailing Romance as lost, and words poetic  
As winged, with the passing of a quill  
You think all genius dead, where arts kneel  
To your substantial ill.

Blind bat, "sneezing that Romance is living,  
Born with new births and nursed with new desires  
To grow the undrained of old-fresh fuel giving  
To feed the poet's fires.

Do you not hear her harmonies unweaving  
The tress and the tumult of the times?  
Treading the turel, yea, and ever leaving  
A rising scale of chimes?

Do you not feel her throbbing pulses, glowing  
Where blotted steam or bridled thunderbolt  
Champ their stalled strength while you prate all unknowing  
Of emper, ohm and toll?

"Machine made men," you cry at us, whose labors  
Have caught and coiled and passed the word along,  
Us, who have bridged the world, and made your neighbors  
Utter Thule's throng.

"Machine made men," are we? and slaves of science?  
Soulless, and automatic in our work?  
Perhaps—and yet I know one such appliance  
Wherein a poem lurks.

'Tis just a little tube of metal filings,  
Inducted-Polarized—or what you will—  
Unsentient, knowing naught of tears or spillings—  
How could it feel a thrill?

And yet at summons of a strange vibration  
Its senseless parts cohere, with dash and dot,  
Till shone to shone, and nation unto nation,  
Sends living waves of thought.

So we, at times unthinking and unheeding,  
Catch, register and vocalize the call  
Of deep to deep, and give you for your reading  
The writing on the wall.

By wire run landways, by Macconi's steeples,  
From ship to ship, or by the cable-rose,  
We gather all the bay of outer peoples—  
Yes, from the least of these.

And spread them far, as a never ending wonder  
Of webspun—old lore more than man can know—  
Joint prod' of Watt's steam and Franklin's thunder—  
China, etc., etc. The last mentioned was  
The d'—g'st of the Hoe!

The JAYS CRIST OF THE HOE!

(The Denizen Whispers.)

I say, old chap! I'm sorry I was funny—  
Or tried to be—but, really, you're immense!  
Give me a paper, please—No, keep the money,  
I've got more dimes than sense.

## HE REJECTED A GENERAL.

London Recruiting Sergeant Refused to Enlist the Man Who Led the Rhodesian Expedition.

There is a good story about the military life in London at the expense of Major-General Plumer, a member of the Army Council.

The general, who, although a very good soldier, as was proved in the South African war, is a very insignificant looking man, of poor physique, desired to find out for himself the true condition of affairs in regard to recruiting; for the army, which is at a very low ebb just now.

The general thought that perhaps the recruiting sergeants were not persuasive enough, or that perhaps they were somewhat rough in their dealings with recruits.

So the brilliant officer put on an old suit of clothes and presented himself to a certain sergeant as a raw recruit.

The sergeant merely looked him up and down, spat on the pavement and remarked, "We don't want worms in this army—we want men. Get out of this!"

The general conceived his wrath, admirably, but the story got about and the unfortunate recruit, who soon discovered whom the august personage he addressed really was, has now been relieved of his duties for not knowing how to deal with would-be recruits.

## NEW JAPANESE BATTLESHIPS.

Will Be Among the Most Powerful Ever Built.

The Japanese navy has now under construction two battleships, which are probably the most powerful of any built or building of any except the "one battleship" recently ordered by Great Britain for the navy.

They embody the lessons of the present war, the striking feature is that, in addition to the usual main battery of four 12-inch guns, they also carry four 10-inch guns. The 10-inch gun was the main armament on several of the destroyed Russian battleships, and is the main armament on one or two modern British battleships to-day. Therefore, it may be said that the main battery of each of the two Japanese vessels is equal to that of two battleships of some existing type.

According to Messrs. Armstrong, the power of the 10-inch gun will be such that no armor that any ship carries can hope to withstand them up to a distance of 3,000 yards. The 12-inch gun will have a penetrating power which will be equal at present to any in any navy. It is estimated that with about 18,000 indicated horsepower, the speed of the two ships will be 18½ knots an hour.

## THEORY OF CANCER.

Specialists Agree That White Corpuscles are Responsible.

"It fits in with modern theories as to the cause of cancer."

Two summaries of the opinions expressed by specialists upon the theory that the white corpuscles, or "soldiers," of the blood are responsible for the birth of the cancer cell.

The theory recently elaborated by Professor Metchnikoff, of Paris, that white blood corpuscles, by gradually encasing the system, bring about the condition known as "old age," is held to substantiate the new cancer theory.

"I am greatly surprised at the theory," said one eminent authority, "for we always believed that the white corpuscles endeavored to prevent cancer from invading the tissue. Bearing in mind the life and functions of the corpuscles, however, it is more than possible that investigation may prove the corpuscles sometimes a rogue."

## THE FIRST INTERVIEW.

Who was the first public man ever interviewed by England's Mr. Wren? He said it was Mr. W. E. Forster, about 1860 or 1861. And Mr. Stead was the interviewer.

"Mr. Stead interviewed Forster on his return from the East. Mr. Forster came to see me immediately after the interview appeared, and I reproached him for having contumaciously such an admirable innovation from America. We had a long discussion, and in the end agreed that while the ordinary interview was not a thing to be encouraged, yet that the interview in which a man stated his views on some great topic of interest might be useful to the person interviewed and to the public generally."

Mr. Forster, however, was much blamed at the time for having submitted to being interviewed.

## CAREER OF A SCOTCH BOY.

John Tod, the subject of Mr. Sprague's brochure, was, as the title implies, a Scotch lad who rose through successive steps to the highest positions in the gift of the Hudson's Bay Company. He was the contemporary, and peer in many respects, of Douglas and McLoughlin. He was one of the most remarkable characters in the history of even the great company.

In his declining days Mr. Tod lived at Oak Bay, Victoria, and his house was a house of call for many horsemen, who revelled in their favorite sport before the dawn of fences and enclosures. It was after long conversations on such occasions that Mr. Sprague made the notes which form the basis of this series of articles, which take the form of a self-memoir of Mr. Tod.

The writer, Gilbert Meston Sprague, is known in literature as the author of several works: "Secrets of the Horse in English Literature," "Secrets and Studies of Savage Life," "On the Poetry of Sir Walter Scott," "Physical Politics: The True Macheath," "The Education of the Rural Poor in England," "The British Opium Policy in India and China," etc., etc. The last mentioned was the first prize essay in a competition open to the world, and the award of \$1,000 was by the Indian Viceroy and the Governors of Bombay and Madras. Mr. Sprague came to Victoria in 1891, and was a friend of the "Scotch Boy," the Honorable John Tod, whose career he depicts.—Eds.)

## Look's Cotton Root Compound.

Is the only reliable regulator of the female system. It is the only medicine that can be taken in the heat and time of the month.

Prepared in two degrees of strength. No. 1 and No. 2. No. 1—For ordinary cases. No. 2—For special cases—10 degrees stronger—three dollars per box.

Ladies ask your druggist for Look's Cotton Root Compound. Take no other as all pills, mixtures and imitations are dangerous. No. 1 and No. 2 are sold and recommended by all druggists in the Dominion of Canada. Mailed to any address on receipt of order and four-cent postal stamp. See Check Company, Windsor, Ont.

Box 1 and 2 are sold in all Victoria drug stores.

## IN THE WHIRL OF FASHION.

### The Return of Louis XVI Dress.

WE perhaps unconsciously place a greater value on the styles to come than on those that we have already had. The antichristian of constructing a beautiful gown is worth half the pleasure of wearing same. At a recent famous wedding which lately took place in New York it was noticed that black velvet formed the costume of a large proportion of the guests—not only worn by the elder young society buds, also the silver gray chignon velvet costumes were seen in numbers.

We present on this page a Marie Antoinette gown, which is something out of the ordinary. It is said that we are going back to the styles of long ago, and that 1905 will be notable for novelty and antiquated dress. It is not every woman that can wear these effects becomingly. Changes in fashion or anything else are not made in a day. It isn't every woman that can afford such changes. Nor is it possible for every woman to attend society functions, or ordinary tea, or church socials, because of weaknesses which are peculiar to the sex. The household duties and cares are all that the woman's strength is equal to. If the woman suffers from backache, nervous spells, headache (usually in the back of the head), a feeling of irritability and constant restraint, it is probably due to functional troubles, especially feminine. It was not intended that women should suffer so much at regular periods, nor that she should be pulled down with drudgery and catarrhs, conditions so prevalent. The minute she takes a tonic just fitted for such cases, and not intended for any other trouble but the disease of the feminine functions, just so soon will she begin to mend and gain proper strength and health and the nervous manifestations will begin to disappear.

## To regulate the functions and put the

possible condition, the young women or a woman passed the girlhood days should take a tonic made entirely from roots, herbs and barks, without a particle of alcohol, or narcotic—a remedy like Dr. Pierce's Favorite Prescription, which is designed for one purpose only, namely, to cure women of those peculiar ailments which drag her down and cause those nervous troubles which make so many women miserable.

Many thousands of women are cured each year by the use of this "Favorite Prescription" of Dr. Pierce. Take this for example:

"I would have written you before, but have had a severe attack of pleurisy, and have been away for a week. Since, as I have just got home," writes Mrs. S. Adlam, of Peterboro, Ont. "When I wrote to you I was just about as miserable as any one could be. Could not eat or sleep, had bladder trouble, womb trouble, rheumatism and female weakness. I took eight bottles of Dr. Pierce's medicine, 'Favorite Prescription' and 'Golden Medical Discovery,' three bottles of Dr. Pierce's Compound Extract of Smart-Weed and four of his 'Pleasant Pellets.' I derived great benefit from the use of these medicines. The 'Favorite Prescription' is a wonderful medicine for women. I know several ladies who have used it previous to confinement and they say they would never have gone through as well without the use of your 'Favorite Prescription.' I am not bothered at all with any of the complaints that I had formerly. Can both eat and sleep well. I intend, however, to continue the 'Golden Medical Discovery' for some time so as to strengthen my lungs, which the doctor tells me, are very weak. He drew nearly three pints of fluid from them."

"I thank you very much for your remedies and your good advice and will recommend your medicines to every sick woman I know. If you think my testimonial will help any suffering woman, you may use my name."

## SYNOPSIS OF REGULATIONS FOR DIS-

**POSSESSION OF MINERALS ON DOMINION LANDS IN MANITOBA, THE NORTH-WEST TERRITORIES AND THE YUKON TERRITORIES.**

Gold—Costs made by prospectors at \$100 per acre for soft coal, and \$200 for anthracite. Not more than 120 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz—Persons of eighteen years and over and joint stock companies holding from miners' certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$7.50 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered mineral place, may locate a claim 1,000x1,500 feet of mining out the same with two legal poles, bearing location notices, one at each end on the line of the road or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$2.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid, the recorder may, upon making a survey made and upon complying with other requirements, purchase the claim for \$100 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica and copper in the Yukon Territory, of an area not exceeding 100 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 per cent. of the sales of the products of the location.

Placer Mining—Manitoba and the N. W. T., excepting the Yukon Territory—Placer mining claims generally are 100 feet square. Entry fee, \$5, renewable yearly. On the North Saskatchewan River claims, a better bar or bench, the former being 100 feet long and extending between two low water marks. The latter includes the diggings, but extends back to the base of the hill or bank, but not exceeding 150 feet. Where steam power is used, claims 200 feet wide may be obtained.

Draining in the Yukon Territory and the N. W. T., excepting the Yukon Territory—A free miner may obtain only two claims of five miles each. For a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive, entries for bar diggings or bench placer mining, except on the Skegway River where the lessee may dig to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but may lease or company may be obtained more than one lease one dredge for each five miles or fraction, is sufficient. Rental, \$10 per claim for each mile of river leased. Royalty at the rate of two and a half per cent. collected on the output after it exceeds \$10,000.

Draining in the Yukon Territory—Six months' notice shall be given by the lessee to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by the location on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six miles from each date. Rental, \$100 per mile for the first year and \$10 per mile for each subsequent year. Royalty, 2½ per cent. on the output after it exceeds \$10,000.

Placer Mining in the Yukon Territory—Creek gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims situated on a river, two legal poles, one at each end, bearing notices, entry must be obtained within ten days. If the claim is within ten miles of Mining Recorder's Office, one extra day allowed for each additional ten miles or fraction.

The person or company wishing a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, the amount of which no royalty shall be charged. The rest of the party ordinary claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent. on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by which he or they may work their claims in partnership by doing notice and paying fee of \$2. A claim may be abandoned, and another claimed on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum. And the Minister may reserve for an individual or company having machinery on the land to be prospected an area of 1,000 acres for such period as he may desire, the length of which shall not exceed three times the breadth. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well, will be sold to the prospector at the rate of \$1 an acre, and the remainder of the tract reserved, namely, 1,280 acres, will be sold at the rate of \$3 an acre, subject to royalty at such rate as may be specified by Order in Council.

W. W. CORY,  
Deputy of the Minister of the Interior,  
Dept. Interior.
